## FOAMING HAND SOAPS

When used with the #116D Foaming Hand Soap Dispenser, our Foaming Hand Soap Cartridges dispense a foamy soap that creates a 30-35% savings compared to the standard 800 ml bag-in-a-box. Because of less soap used per hand washing; the cartridges last longer, saving expensive refilling time. The foaming soaps flow completely out of their cartridge, while bag in a box systems leave on the average of 70 ml still in the bag when a soap stops flowing. Foam soaps wash off easier, faster. People seem to just like foam better!

## AERO INSTANT NON-ALCOHOL FOAM HAND SANITIZER

An effective sanitizer that offers a 99.9% kill rate against all microbes. Much milder to the hands than Alcohol Based Hand Sanitizers. The regular use of alcohol on one's hands dries out the skin. Small cracks in the skin actually traps dirt, grease and germs. Several studies have shown long-term usage of instant hand sanitizers with alcohol to be counter productive. This product kills germs without these problems.

## ICE DAM BLASTER ICE MELTER SLEEVES

Sleeve size 2" x 24". An ice dam forms when there is snow on the roof, the roof temperature is above zero (as a result of poor insulation, sunlight hitting a dark roof, etc...) and the temperature of the overhang and gutters is below freezing. The water (melted snow) turns to ice when it runs down to the cold part of the roof. As it freezes, it forms an ice dam. As more water backs up and turns to ice, it can back up under shingles and cause roof damage as well as leak through walls and ceilings, causing interior damage to your home. The Ice Dam Blaster is a sleeve filled with deicer material that is long-lasting and won't damage the roof or its components (including roofing nails, shingles, gutters and down spouts). In addition, the run-off will not damage turf, shrubs, flower beds, or concrete at the bottom of the down spout.
